

JOBSONHIO 2014 PERFORMANCE BY COMPANY SIZE

We continue to succeed at helping businesses grow jobs and capital investment within the state by working with companies of various sizes in our industry sectors. Large corporations have an established presence in our key industries. Middle market companies are creating the majority of the jobs and capital investment. Small businesses are innovators and will drive future job growth.

Over half of our projects focused on middle market companies who drove more than 50 percent of the jobs created and capital investment. Nearly 85 percent of our projects focused on small business and middle market companies. This accounted for almost 70 percent of the jobs and capital investment created in 2014.
