

# JOB SOHIO 2015 PERFORMANCE BY COMPANY SIZE

We continue to succeed at helping businesses grow jobs and capital investment within the state by working with companies of various sizes in our industry sectors. While large corporations have an established presence in our targeted industries and make significant capital investments to grow their businesses, most current and expected job growth is coming from small and medium enterprises (SMEs).

More than 80 percent of 2015 projects were with SMEs and a majority of job creation came from these companies. For large corporations, many of the new jobs and capital investments were driven by projects with Amazon, Barclaycard US, and Advanced Power.

<b>LARGE CORPORATION</b> Revenue > \$1 Billion	<b>MIDDLE MARKET</b> \$10 Million-\$1 Billion	<b>SMALL BUSINESS</b> Revenue < \$10 Million
